

OVERVIEW

A stratified insulator made of fibreglass fabric and epoxy resin. Suitable for high-frequency equipment and, in general, for components submitted to high dynamic stress, due to its high fatigue-resistant properties. Good dielectric properties and excellent mechanical properties.

Type: HGW 2372, 2572-1, 2372-4, DIN 7735

Thermal Class: F type (150°C) and H type (180°C)

Formats:

- Lengths of 2000 and 1000 mm.
- Thickness starting at 0.2 mm.
- Other formats are available on request.

TECHNICAL CHARACTERISTICS
